

I want to get this scholarship because I think that Korean is a fun and interesting language. I am Hmong and I watch Korean drama because I just love the language. I never understand what they say so I have to put on subtitle all the time. My favorite band is a Korean band BIG BANG. I listen to their songs all the time but I don't understand what they say. I want to learn about how the culture is, because I want to know what they do that is different from what we do.

I want to learn the language because I listen to music in Korean and I listen to Korean music, I want to understand what they say. The language sounds very cool, because its all just saying it out, you don't have to think if this or that word fits in it. If I get this chance to go to this camp then I would be completing one of my goals that I have. It would make my life fulfilling because I want to become a singer so I want to learn how to sing in it, it would make me very happy.

I want to go to this camp because I have been wanting to learn Korean culture since I was a little girl. I have been wanting to go there, but I don't know what to do when I get there and I don't understand anything when I get there. So if I learn about it and speak it then, when I grow up I get there I will be able to understand what to do and what they are saying to me when I get there. So I really want to get this scholarship to go to this camp for the summer this year!! Please accept me!!
