**COVID-19 Transmission at Camp:**

# **RISK REDUCTION**

Learn more about the steps we are taking at Concordia Language Villages to reduce the risk and spread of COVID-19 on-site, keeping villagers and staff as safe as possible.

Concordia Language Villages has taken rigorous steps to reduce the risk of COVID-19 transmission in connection with our programs. Even still, participation in a residential Language Village program (including any related travel) carries certain inherent COVID-19 risks that aren't easy to avoid.

Inherent risks may include, but are not limited to:

- Coming into close contact with individuals or objects that may be carrying COVID-19.
- Transmitting or contracting COVID-19, directly or indirectly, to or from other individuals.
- Injuries and/or complications ranging in severity from minor to catastrophic, including death, resulting directly or indirectly from COVID-19 or the treatment thereof.

With your help and commitment, we can create an environment that helps to protect the health and well-being of all participants and staff! Here's how we can work together:

## EXPECTATIONS PRIOR TO ARRIVAL

- All participants **must** be fully vaccinated.
  - To consider you fully vaccinated, you will need to have received either two doses of a two-dose series or one dose of a one-dose series.
    - Upload proof of vaccination to CampDoc health records
  - We **highly recommend** boosters for any eligible participant
- All participants are required to submit proof of a negative COVID test within **72 hours** of arrival
  - Test results will be uploaded into CampDoc
  - Tests can be PCR or home antigen tests
    - Please remember PCR tests are more accurate and, thus, more likely to detect an asymptomatic COVID-19 infection.

## EXPECTATIONS WHILE LIVING ON-SITE

- While on-site, there will be lots of opportunities to mingle with other villagers. During these moments, we expect at least one of three main mitigation measures (masks, distance or outdoors) to be followed:
  - Outdoors as a group; no masks required
  - Indoors; no masks are required when spaced more than six feet apart or within individual family living quarters.
  - Indoors; masks required when less than six feet apart
- Masks:
  - N95, KN95 or KF94 masks offer the best protection
  - Cloth face coverings must be tight-fitting around both nose and chin.

- To decrease potential exposure, we ask that all participants remain on-site for the duration of their stay (excluding an urgent or emergent situation)
- **For Adult, Family and/or Spring or Fall programs:** Concordia Language Villages does not provide health care on-site. If you develop symptoms of COVID-19 during the program, you will be asked to isolate, seek testing, and/or leave.

## EXPECTATIONS AFTER DEPARTURE:

- Any participant who tests positive for COVID-19 **within ten** days of their program at Concordia Language Villages should notify our Health and Wellness department to ensure we may properly notify any exposed staff or participants.
  - Email: [health@cord.edu](mailto:health@cord.edu) or call 218-586-8771
