# The Flying Leaf: The Dream

By Dillon

Chapter I  
The Wish

Once upon a time there was a tree with approximately 323 million, 949 thousand, 628 leaves. It was a giant, huge tree. One of the many, many leaves, there was one leaf that wants to fly, so the leaf waited to fall. That leaf was Banny. Banny really, really waited so much for fall.

Chapter II  
Dang!

One day in fall, it was really windy. Banny was so excited because he really wants to fly. He wanted to close his eyes so it would be more interesting. He waited and waited but nothing happened. Banny waited for whole fall but he didn't fall down.

Chapter III  
Winter

It was cold winter. The winter blew extremely hard. Banny was excited.  
-20° F: Still exciting. -30° F: Start to freeze. -50° F: Frozen. -100° F: Next day he was still frozen. One

baby saw that leaf and said "Gababookylianoolyliamoozyxilam lit!" When the baby said that, Banny magically was unfrozen. WOW! TA DA! MAGIC!

Chapter IV  
Half

Already one billion, 161 million, 917 thousand, 312 leaves fell. Banny still didn't fall. Next 580 million, 486 thousand, 156 leaves fell. Banny still didn't fall. Next 290 million, 243 thousand 78 leaves fell. Banny still didn't fall. It did and did until Banny was only leaf that was on the tree.

Chapter V  
Flight!

Finally next day Banny fell. It was very windy day in the whole USA so Banny flew through California, Nevada, North Dakota, South Dakota, Minnesota, Missouri, Arkansas, Florida and through Atlantic, Asia, Australia, and back to Pacific. During flight on Pacific Ocean the long wind stopped so Banny fell down under the ocean.

Chapter VI

Underground city Atlantis

When Banny fell down about one mile, Banny saw a big civilized city. It was underground city, Atlantis! Where mermaids and fish live. Banny traveled around and Banny realized it was way much better city than his home, Chicago.

Chapter VII

Banny bought a home, next day and he got address: <Atlantis, Leaf House, Cove St, Atlantis, UG 12345, Pacific Ocean.> It wasn't really even little different than other addresses. Banny loved his leaf house anyway. Banny was so peaceful that he didn't go back to his house.

## New town council, new taxes...

The first decision that the town council made was about the taxes: every council has to pay 25% of his profit to the government and if they don't make profit the tax is 1 homey. Isn't this too high? With all this money the town council is going to start some projects with the others

councils.... When are they going to start?? On August the 2nd? Also, the store's profit is divided in two equal part: One for the chamber of commerce, that help in the store, and the other for the town council. Why the town council should receive half the store's profit?! Guys, we

want good events, ideas and project .... Not only taxes!

## Simtown has a new government !!!

On Thursday July 24, 2008 we had our second election for the new town council. All of the candidates worked really hard for the election. They all wanted to win the election but, unfortunately we can just have one representative for each position. However, congratulations for all of them because you guys made a good campaign. I am sure that

the new government is going to work hard to make a Simtown a better place for everybody. We are going to spent some changes in the new town council. But we hope it is for good. The ones who won the election are Valen for major, Hayley for treasurer, Kiri for sheriff, Jack for judge.

## The hike to the Mississippi

On Wednesday the environment group went to a hike with Aiofe. She took them to the Mississippi River and they said that they were very exciting.

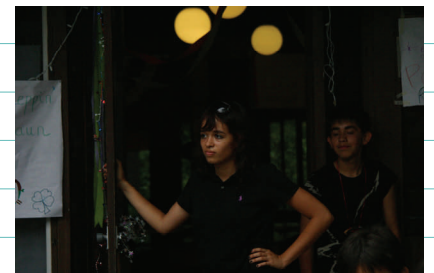

“The Mississippi River is very beautiful and it is really close to Hometown” said one of the member

from the environment group. The said that it was not clean. There was not a lot of garbage on the beach, but anyway it was dirty. The environment group said that this was a lesson for everybody because it is necessary to keep our environment and

any natural resource clean.
